

SEPARATELY METERED BUILDINGS IN ENERGY WATCHDOG

Job Corps centers must enter energy and water data from separately metered buildings in Energy Watchdog. This reporting is required by the Department of Energy, Federal Energy Management Program.

The Engineering Support Contractor needs to know which accounts are metered separately by building. We will add these accounts in Energy Watchdog for you to fill in. Several centers have been entering this data already. Please provide this information even if your Energy Watchdog account already shows all separately metered buildings.

For example, if the Hamilton Job Corps Center has the following electric meters on center.

Meter	Buildings	Usage (kWh)	Cost
A00012345	Main Building 1 Only	10,000	\$1,000
A00012346	Buildings 2, 4, 6 and 8	15,500	\$1,550
A00012347	Gym, Building 3 Only	50,000	\$5,000
A00012348	Exterior Lighting	30,000	\$3,000

The center would have two separately Metered Buildings Main Building 1 and Gym, Building 3. The other usage of Buildings 2, 4, 6, and 8, and the Exterior Lighting should be added together and entered in the center account in Energy Watchdog.

Account Number	Building	Type	kWh	Cost
Main Building 1 Electricity	Main Building 1	Electric	10,000	\$1,000
Gym, Building 3 Electricity	Gym Building 3	Electric	50,000	\$5,000
Hamilton Electric	Hamilton Job Corps Center	Electric	45,500	\$4,550

Attachment B

Enter data by individual building for all of Fiscal Year 2016 dating back to October 1, 2015. Be careful not to double count meter entries.

Contact Eric Siddle of the Engineering Support Contractor with any questions: 703-875-7647, or siddle.eric@dol.gov.

Due Date is November 18, 2016, for all metered building utility usage to be entered into Energy Watchdog.
