Job Corps Center Security Survey

The Job Corps Security Advisory Committee is developing a plan for improving security and personal safety for students and staff at all Job Corps centers. In order to plan most effectively, the committee needs to have an understanding of what is currently in place. To that end, a revised survey is being conducted to include additional questions raised by the Security Advisory Committee. The results of this survey will help the committee assess current practices, as well as those areas needing improvement. Your feedback is important.
